Education

Symbiosis Institute of Technology, Pune - Expected June 2026
B. Tech in Computer Science Engineering, CGPA – **7.8**
Anandalaya School – Completed May 2022
Stream: PCM with Computer Science, 10th Board: **96.4%** | 12th Board: **85%**

Skills

Languages: C, C++, Python, HTML, CSS, JavaScript, SQL, Java (Basic)
Tools and Frameworks: Git, React.js, Node.js, Express.js, MongoDB, Postman, Sckit-learn, Pandas, Arduino IDE

Relevant Coursework

Data Structures and Algorithms, OOPS, Agile Methodology, Generative AI, Computer Networks, Operating Systems, Databases (RDBMS), Discrete and Financial Mathematics, Communication Skills, Critical Thinking, Sensors and Microcontrollers

Projects

Parkinsons Disease Prediction [GitHub]

- Developed a classification model to predict the presence of Parkinson's disease based on various medical features.
- Models used: XGBoost, Random Forest, KNN and Naïve Bayes
- Evaluated the models by comparing accuracy, precision and recall and analyzing AUC-ROC
- Achieved 87% accuracy by using XGBoost algorithm and compared it with other models.

Arduino-Based Street Light Automation [GitHub]

- Utilized IR sensors, LEDs, and PWM for dynamic light control based on vehicle presence.
- Achieved up to 80% energy savings, reducing costs and extending the lifespan of street lighting systems.
- Replaced sodium vapor lamps with energy-efficient LEDs, minimizing greenhouse gas emissions.
- Automated street lighting control to reduce manual intervention and optimize urban infrastructure.

Report Generation Website [GitHub]

- A full-stack report generation application for a NGO that allows users to manage and view reports. The app is designed with React on the frontend, Node.js on the backend, and utilizes PostgreSQL for database management.
- User Management: Allows admins to manage volunteers and assign roles with specific access permissions.
- Report Management: Enables users to create, edit, view, and print reports for streamlined data tracking

Achievements/Certifications

- Published paper titled “Efficient Illumination: Arduino-Based Street Light Automation for Energy Savings”, ICETCI ’24 [IEEE]
- Google Cloud Engineering Certification from Google
- Databricks Accredited Generative AI Fundamentals
- Project Management Fundamentals certification from IBM SkillsBuild
- Computer Network Fundamentals certifications from Cisco NetAcad
