PROJECT EXPERIENCE

1. House Price Prediction using Django and Python | *Code*

- **Developed a Web Application for Predictive Analysis**: Designed and implemented a web application using Django and Python to predict house prices based on various features such as location, size, and rooms.
- **Machine Learning Integration**: Integrated machine learning algorithms to analyse historical data and generate accurate price predictions. Employed techniques such as linear regression.
- **User-Friendly Interface**: Created an intuitive and responsive user interface with Django templates and Bootstrap, enabling users to easily input data and obtain predictions.
- **Data Management and Visualization**: Managed and pre-processed large datasets using Pandas and NumPy.

2. Notes Application using ReactJS ,TailwindCSS and ViteJS | *Link* | *Code*

- **Developed a Full-Stack Notes Application:** Designed and implemented a notes application using React.js for the front end and Node.js with ViteJS and TailwindCSS, enabling users to create, edit, and manage their notes efficiently.

EDUCATION

SYMBIOSIS INSTITUTE OF TECHNOLOGY **Pune, Maharashtra**
B.Tech (CSE) CGPA : 7.8 *Graduation:2026*

ANANDALAYA EDUCATION SOCIETY (CBSE) **Anand, Gujarat**
Percentage 10th Board: 96.4% | 12th Board: 85% *Graduation: May 2022*

SKILLS/ACHIEVEMENTS

- Proficient in C/C++, Python, Java, MySQL. HTML, CSS, JavaScript, Django.
- Understanding of Agile, Computer Networks, Operating Systems and Databases, Financial Mathematics
- Earned the Project Management Fundamentals certification from IBM Skills Build and Certified Postman API Fundamentals Student Expert by Postman Academy.
- Google Cloud Engineering Certification from Google.
- Published paper titled *Efficient Illumination: Arduino-Based Street Light Automation for Energy Savings at* ICETCI 2024.
- Completed “Networking Basics” and “Introduction to Cybersecurity” from Cisco Networking Academy.
