PROJECT EXPERIENCE

1. House Price Prediction using Django and Python | *Code*

- **Developed a Web Application for Predictive Analysis**: Designed and implemented a web application using Django and Python to **predict house prices** based on various features such as location, size, and rooms.
- **Machine Learning Integration**: Integrated machine learning algorithms to analyse historical data and generate accurate price predictions. Employed techniques such as **linear regression**.
- **User-Friendly Interface**: Created an intuitive and responsive user interface with **Django** templates and **Bootstrap**, enabling users to easily input data and obtain predictions.
- **Data Management and Visualization**: Managed and pre-processed large datasets using **Pandas** and **NumPy**.

2. Parkinsons Disease Prediction | *Code*

- Developed a **classification model** to predict the presence of Parkinson's disease based on various medical features.
- Models used: **XGBoost, Random Forest, KNN** and **Naïve Bayes**
- Evaluated the models by comparing accuracy**, precision** and **recall** and analysing **AUC-ROC**
- Achieved **87% accuracy** by using **XGBoost** algorithm and compared it with other models.

EDUCATION

SYMBIOSIS INSTITUTE OF TECHNOLOGY — **Pune, Maharashtra**
B. Tech (CSE) CGPA: 7.8 — *Graduation:2026*

ANANDALAYA EDUCATION SOCIETY (CBSE) — **Anand, Gujarat**
Percentage 10th Board: 96.4% | 12th Board: 85% — *Graduation: May 2022*

SKILLS/ACHIEVEMENTS

- Proficient in C/C++, Python, Java, MySQL. HTML, CSS, JavaScript, Django.
- Understanding of Agile, Gen AI, Computer Networks, Operating Systems and Databases, Financial Mathematics, Scikit-learn and Pandas.
- Earned the Project Management Fundamentals certification from IBM Skills Build and Certified Postman API Fundamentals Student Expert by Postman Academy.
- Google Cloud Engineering Certification from Google.
- Databricks Accredited Generative AI Fundamentals
- Contributed to open-source repositories during HacktoberFest 2024
